Building Healthy Soil: Pasture and Grazing Management Techniques

Are you interested in increasing your operation's efficiency, profitability, and crop yields while building optimum soil health on your farm?

Join Us to hear more and see live demonstrations of the Yeoman's plow and Soil Aerator!

WHO: agricultural producers (focused on grazing & animal/hay pasture management)

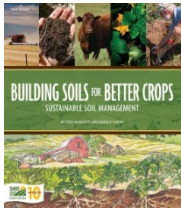

WHEN: Wednesday, October 7, 2015

WHERE: Normanton Farm, 226 Charles Bancroft Highway, Litchfield

TIME: 12:30 PM - 3:00 PM

COST: FREE, but pre-registration required

RSVP: Kerry Rickrode, HCCD, kerry.rickrode@nh.nacdn.net or 673-2409 Ext. 100 by **October 5th**
light lunch and refreshments will be served at 12:30 PM

FREE copy of SARE Building Soils for Better Crops manual to first 15 registrants!

Experts from USDA NRCS, UNH Cooperative Extension and local farming communities will discuss:

- Why healthy soil is important and ways to increase your soil's potential
- Management of permanent sod or in rotation with annual crops
- Deep and surface soil compaction of forage crops
- Soil fertility, root growth, seeding methods such as no-till and frost seeding
- Grazing management
- Utilizing cover crops to achieve optimum soil health
- Impact on crops by implementing these practices
- Live demos and discussion of Yeoman's plow and AerWay Soil Aerator (rental available)
- Case studies on how these practices have improved operations
